

Red Kite Autumn Curriculum Overview

In Maths, we will be focussed on the 4 rules of number; (addition, subtraction, division and multiplication) and how they are applied to real-life and practical problem-solving.

Our main subject of study this term is Brazil. We will be learning all about its history (including slavery and exploitation), its culture (Carnivall), habitats, rainforest, rivers, sporting achievements. We will be finding links between that country and ours.

In Literacy, we are learning how to write Warring stories, through the Talk for writing programme, as well as continuing our study of spelling and grammar.

Our study in Science this term is all about HABITATS; the climate, location, flora and fauna which inhabit them. What sets them apart and how have living things adapted to enable them to survive and thrive there.

We are lucky enough to have a music specialist working with us this term, using a variety of musical instruments and learning new songs.

P.E and Outdoor learning continue as always with a rich programme of activities and skill-based learning.

In R.E. and P.S.H.E. this term, we are considering what it means to be Human; how we make and maintain healthy friendships and how we can help our fellow citizens.

Our study of modern foreign languages this term is Spanish.
